## Prof Min Zhang

Prof Zhang's innovation involves a suite of proprietary and Internet software to technologically enable his linguistics courses and to shift the pedagogy from a teachercentred to a learner-centred paradigm.

This technology enhancement has been implemented in five key areas:

- Digitization of all course related content to increase ease of access
- Annotated Internet resources
- Existing virtual tutorials
- Digitized samples of student-generated content for acoustic analysis
- Proprietary language-related computer software

The proprietary software packages are based on innovative artificial intelligence software which uses natural language processing and allows natural language communication between students and the machine. The software also analyzes metaphorical inference and

What this course is about

第一個將女人比作花的是天才,第二個是蠢才,

> The course will not train you to be a literary genius.
> The course will explain how metaphor works in the minds of 天才、蠢才and 傻瓜、with emphasis on the latter two

第三個就是傻瓜了。

interpretation.

O my luve is like a red, red rose That's newly sprung in June.

> "A Red Red Root", by Robert Barre (1759-1796) But soft! What light through yonder window breaks? It is the East, and <u>Juliet is the sun!</u> Arise, fair sun, and kill the envious moon, Who is already sick: and pale with grief That thou her maid art far more fair than she. "Romes and Jaliet", by William Shakespeare (1595)
